DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29, drawn to instrument wash system, classified in class 134, subclass 198.
 - II. Claims 30-34, drawn to a drive mechanism comprising a motor and programmed controller for an analyzer, classified in class 422, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

The inventions as presently claimed in Group I to Group II are deemed to be independent inventions. The vertical guide, washing device with jet orifice to spray wash fluids at instruments features of the claims of Group I are not required by the claims of Group II. Similarly, the at least one motor or programmed controller features of the claims of Group II is not required by the claims of Group I. None of the claims as presently written link together the inventions set forth in Group I to II.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Friedrich Kueffner on May 15, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
